

Pervious Concrete Pavements

Certification Class & Exam

For Ready Mix, Contractors, Inspectors, Consultants,
Architects, Landscape Architects, Engineers, Etc.

Sept. 9, 2010
9:00 am to 3:00 pm

This will be held in the CPG conference room from 9 am to 12, then participants will move to the Concrete Materials Plant (9900 West 75th Street Merriam, KS 66204) for the field placement portion of the certification.

Continuing Education
Credits Available:
4 PDHs, Engineers,
4 AIA-HSW, Architects,
4 LA CEUs, Landscape Architects
4 Hours, Contractor Licensing

Municipalities are encouraged to send one person from their city/county to be certified. This is typically the stormwater engineer and/or an inspector on municipal payroll. This is to encourage quality pervious concrete construction practices and enforcement. One person per municipality is complimentary, each additional person \$75.00 each.

The class covers:

- Pervious concrete history
- Tools used for placement
- Placement and finishing techniques
- Curing and timing of curing
- Basic layout and depth design
- Basic mix design & materials
- Overview of current testing and maintenance
- Resources & Local Guidelines
- Stormwater Compliance, Local Codes

The classroom session will be followed by a 30+ question multiple choice exam, then lunch. After lunch there will be a "hands on" field session where participants will actually place pervious concrete themselves. **Participants should dress appropriately and come prepared with work boots, work clothing and gloves.** Everyone pitches in.

All who pass the classroom test (minimum of 80% on the written exam) and participate in the hands-on training, will receive a certificate and pocket card stating they have successfully completed the course. This certification is required per specifications on most pervious concrete projects, and in projects where the pervious concrete will be used as part of a Phase II Stormwater BMP. Contractors must have a Pervious Certified Employee on an active job site while pervious concrete is being placed. Certifications are revocable in the event of poor workmanship, or failure to follow the procedures outlined in the Pervious Concrete Training. All active certifications are listed at www.concretepromotion.com, under the pervious tab.

Please RSVP as soon as possible, the class is limited to approx. 20 people:

Name (s): _____

Company: _____

Phone: _____ Fax: _____

E-Mail: _____

Address: _____

____ CPG members \$200.00 for 2 people (two for the price of one).
(\$75.00 for each additional person after the first 2 registrations)
